with quality signage**

Experience the Power of Information Display

Self Service Kiosk

Self-checkout lanes and wayfinding kiosks are self-service opportunities for customers that let retailers create an experience that can generate loyal customers for brick and mortar shops and not just for online commerce.

Self-service kiosks promote customer service that will let people be excited about shopping again. It doesn't just stop at the retail environment, self-service kiosks can be used for check-in and check-out areas in airports and hotels or in a corporate setting for training and other interactive activities.

The key benefits of self-service kiosk are many and some of them include

- Creating opportunities to upsell products that compliment certain purchases while customers browse to find products that they are looking for.
- Very minimal strain even after running for long periods of time.
- Easier data gathering and analytic by getting information based on customer usage of the kiosk.
- Reducing social friction between customers and other in-store factors that can increase sales of additional products or services by 30%
- Convenient to use for customers in the store and can augment the online shopping and services experience in a brick and mortar store setting.
- Focus is directed to building good customer relationship than just solely getting the order right.

Hotel Digital Displays

The concept of the hotel digital signage has been around for a long time, even then with the default hotel channels with the hotel amenities, restaurants and advertising in the hotel room's TV. From Marriot to the Royal Caribbean, digital signage has offered more than just static information and convenience. Expand your hotel and commercial services with

- Digital signage to change schedules and information dynamically and according to event specifications for hotels with conference rooms.
- Interactive digital signage as a wayfinding system to help patrons find their way around the hotel
- Digital concierge kiosks to help self-service check in and check out for patrons while displaying room rates and other important information.
- A means to generate valuable feedback from patrons to be used to shape business operations
- The convenience to give special offers at a moment's notice to reduce vacancies
- Display flight departure and arrival information or tour schedules in the lobby for patrons on business or leisure.

Dual Sided Digital Displays

Dual sided digital displays are perfect for multitasking settings and locations with high traffic. Having screens on both sides of the panel allows for more advertising and information coverage since people can view the displays regardless of which way they are facing.

It is having two screens without shelling out for one more digital signage unit. Productivity is increased without having to exert effort meant for two digital signage deployments. Dual Sided digital signages are perfect for hospitals, schools, shopping malls and any venue with high traffic and even in places separated by walls. The benefits of these dual sided displays do not just stop there

- Conference rooms divided by a wall can have simultaneous meetings discussing different topics
- Use as screen in rooms and architecture separated by a wall to display advertisement and other vital information
- Save time and money from deploying twice the number of digital signage units.
- Enjoy the same features and benefits as you would in single screen digital signage.
- Dual sided displays support two-way traffic viewing perfect for way finding, maps, airport flight schedules, room numbers and so much more.
- Increase the flow of traffic without the need to retract steps to review information. Best suited for restaurants, drive thru and other over-the-counter order-oriented establishments.

Commercial Display

Commercial grade digital signage is specially built for strenuous usage and long hours.

Unlike their consumer grade counterparts that can be seen at home and in big box shops, these commercial display screens have more features suited for industrial usage.

Digital signage is becoming more popular in different venues and industries like schools, hospitals, airports and restaurants, to mention a few.

While consumer TV screens and commercial display may be confused and interchanged, the benefits just do not compare.

| Visually brighter and sharper screens specially made for commercial usage | Extra features made especially for digital signage units and the integration systems which include, but are not limited to, business software, | Take advantage of a robust warranty and support only available for commercial digital signage and deployment.

Touch screen advertisement player with network

Digital Totems and Floor Stands

Digital signage can come in various shapes and sizes, that also includes the digital totem. Enjoy high luminance and color displays with high definition totem screens. These totems are perfect for high traffic locations like shopping malls, hotels, corporate lobbies and so much more.

Uniconnect media provides many options that lets you advertise, collaborate and deliver great customer experience where ever you deploy your digital signage.

Ride the wave of touch screen technology in your store and in business with Uniconnect Media's options for interactive digital signage.

With many using touch screen handheld devices, it is no surprise for digital signage to be involved and use this interactive technology in business and industrial settings.

The ever changing need of customers to seek out a more engaging platform for retail have prompted business owners to move toward a more tech-savvy path and away from outdated means of traditional advertising.

High Quality Projector screens

Whether for entertainment or business, High-Quality Projector Screens are your best option to get the best picture for long range viewing. Having the right two-piece projection system will give you optimized imagery for all types of settings, may it be in a conference room, a home theater or the outdoors.

These professional screens are designed for ease of operation and installation. Motorized or for simulation purposes, Uniconnect Media offers a variety of grade A projector screens.

- Saving space with efficient retractable and motorized projector screen
- Easy to install and maintain.
- Enhanced reflective properties with multiple optical coatings with brilliant highlights, contrasts and color saturation.
- Images will be large and clear even in far distances
- Lessen eye strain with non-LCD surface and a larger resolution
- Simulation projector screens supports a virtually hands-on learning environment for technical trainings

Professional Monitors

Professional monitors are specially designed for business and even academic settings.

These monitors and interactive screens are embedded with solutions to address communication issues. Increase productivity and collaboration with interactive features, 24/7 operation hours for non-interactive monitors, business applications embedded in the software and so much more.

Share ideas and business plans clearly and concisely with group members and other people involved in your whole business process.

Video Wall and Wall Mount Signage

Video walls fuse a series of video displays in one large visual experience. Video walls are being used in various industries due to advancements like the constant increase in video display resolution, interactivity and additional features.

While it may be more attractive to choose other video display options, video walls just have many special features and flexible aspects that cannot be achieved through any other means.

Collaboration, running different data simultaneously in multiple screens, seamless information processing is just some of the key features that can be achieved with video walls.

Multi touch tables

Whether it is for entertainment, leisure, business or shopping, these multi touch tables are perfect for spreading your brand. Let your customers experience interactive information with a touch of a finger. Other perks include:

- Simultaneous uses make customers access information with the least possible time.
- User friendly: Anyone of any age can use and see what you have to offer without stress.
- Its flexibility feature allows any type of content to be displayed to cater your business need.
- Its classy design will touch customers curiosity and will attract them to take a glimpse of what you have to offer.
- Hassle free installation: No need for special technical skills. Its easy set up feature allows you to save time.
